

This is the journal of Adolph Blum, and engineer and top turret gunner on board the B-17 Flying Fortress 42-5863 "Paddlefoot's Proxy" and later 42-30830 "M'lle Zig Zig" written in his own hand to record his work and thoughts during World War II.

★ MY LIFE IN THE SERVICE

THE DIARY OF

A
REMINGTON-MORSE
PUBLICATION

666 Lake Shore Drive
Chicago

Copyright 1941 by Consolidated Book Publishers, Inc., Chicago, Printed in U.S.A.

Your experiences in the armed forces of your country are your part of living history. By all means **KEEP A DIARY!** Times without number, historians and writers have found more information of real human interest in the diaries of enlisted men than in the studied accounts of generals and admirals. This book, conscientiously kept, may prove to be the living record of your destiny five hundred years from now!

Because the events recorded in these pages are likely to be the most significant experiences of your life, and the ones most worth remembering, **DON'T TRUST YOUR MEMORY!** Few minds are endowed with the capacity to recall in retrospect the dates and details of even the most important events. Cherished memories are distorted or lost forever during the passing of the years. The very names of your closest associates and dearest companions may be forgotten.

The value of this record lies in the future; the time for you to create that value is now. The effort required is small, but eminently worthwhile. Resolve to make an entry, however short, **each** day. As your diary takes form you will come to count as lost that day in which you have not written an account of its happenings.

There is a place in this book for your personal identification data, for service information you are required to keep, and for the primary facts of your service record. Under the disciplined and strenuous regime of service life you will note changes in your physical measurements which you will want to record, and space is provided for this.

There are convenient pages on which to keep the names and addresses of the folks back home, the dates on which you wish to send remembrances, the gifts you have received. You will want to keep a record of places you visit and your impressions of them. Then there are the interesting people you meet while in the service . . . your buddies, your officers, interesting civilians; in this book you will find space in which to write about them and to note their home addresses so that you can look them up if you should want to after you are mustered out. Use the autograph section of this book for the signatures of your buddies, together with a characteristic comment from each.

And, by all means, **PICTURES!** One picture is said to be worth a thousand words . . . get as many pictures as you can, of people and places, for an **illustrated** diary is the best of all!

Lt. J.D. Brady	Pilot
Lt. H.H. Crosby	Navigator
Lt. J.L. Hoerr	Co Pilot
Lt. H.B. Hamilton	Bombardier
S/Sgt H.E. Clanton	Asst. Engineer
T/Sgt Saul Levitt	Radio oper.
S/Sgt R.D. Gangiver	Assit Radio
S/Sgt G.J. Petrohelos	Armorer Gunner
S/Sgt J.A. McCusker	Tail Gunner

We are going to war with the intentions of returning. Not to play the hero, not to win medals but to do our job and return the world to peace.

May 30-43

Left Bangor early this morning. We have been flying all day over the most desolate looking country - every where there was still snow and ice on the water and hills. The country hereabouts is entirely uninhabited and I doubt very much if any wild life even exists here.

Late this evening we landed at George Bay - Labrador. My asst. and I worked until 4 A.M. repairing a thermocouple which broke during the long tedious flight. Had 45 min. sleep! George Bay is an isolated outpost. Its only contact with the civilized world is by air and once

Righteousness exalteth a nation.
—Proverbs XIV: 34

each summer a supply ship or two can come in. These boys have a hard job. How they asked us of news from the states, begging what little reading material we carried.

Proclaim liberty throughout all the land unto all the inhabitants thereof.—Inscription on the Liberty Bell

May 30 - 43

May 31-43
6:00 A.M. with gas tanks filled to the brim we took off for Iceland a long cross water hop. Arrived at Meeks Field late in the afternoon. Our first thought was of food and a bed. But again before I could get either I had to check the plane and repair a few minor things in anticipation of an early take off over the longest sea route and longest leg of our journey. Worked until 10:00 P.M. now I can finally get something to eat and may be enjoy a few hours sleep.

Just draw on your grit; it's so easy to quit—
It's the keeping your chin up that's hard.—Robert W. Service

June 1-43
The weather is holding us here for another day. Am thankful for the opportunity of catching up on the sleep which I have lost since beginning this journey. Am going to visit the town of Reykjavik which is 38 miles from the base.

The less there is of fear, the less there is of danger.—Livy

May 31 – 43

But before I could get either I had to check the plane and repair a few minor things in anticipation of an early take off over the longest sea route and longest leg of our journey.

Worked until 10:00 PM now I can finally get something to eat and maybe enjoy a few hours of sleep.

June 1 – 43

The weather is holding us here for another day. Am thankful for the opportunity of catching up on the sleep which I have lost since beginning this journey.

Am going to visit the town of Reykjavik which is 38 miles from the base.

June 2-43

Iceland - the land of the midnight sun.
Was sitting around waiting for it to get dark last night and was surprised to find it was 10:00 A.M. Then I remembered that it stays light 6 mos. of every year.
The inhabitants of this island seem to flourish in spite of the climatic conditions but the American boys which have put in over a year here look pale and sickly.
There are no trees in this section and very little grass. The terra firma is made up of volcanic rock and dust which supports only a poor moss.

Establish the eternal truth that acquiescence under insult is not the way to escape war.—Thomas Jefferson

The town is typically European built and the inhabitants are very unfriendly. No alcoholic drinks can be bought here.

We will leave this place within the hour and I was or am in no mood to stay.

Left Iceland 5:00 A.M. Arrived Prestwick, Scotland in the afternoon. Had a very successful oceanic trip.

My first impression of Scotland was - is, I believe, of the highest. The grass is green and there are trees. This adds much to building up one's moral.

Confidence begets confidence.—Proverb

June 2 - 43

June 3-43
 Visited the town of Prestwick last evening and the people are very friendly also the beer and scotch is excellent.
 This is one place I will regret leaving, however I fear we will leave in an hour or two.
 Took off approx. 10:00 A.M. flew in formation with several other ships. Our escort got lost had to land at an other base than planned.
 Our landing gear would not extend. Tried what we would it would not come down. Flew around four hours using up our gas supply then I made a crash landing.
 Almost everything that is great has been done by youth.
 —Disraeli

June 4-43
 Am I angry - Am I hot under the collar - Am!!! The episode of yesterday afternoon really pissed me off! After bringing her safely over all that water - after losing much needed sleep to keep her in flying shape something of this nature has to happen.
 Of course she will be put back in flying shape but for us "Virile Cyril" is done for.
 This is the second ship we have lost since this crew has been formed.
 As the old saying goes "Three times and out"
 I wonder!
 When we assumed the soldier, we did not lay aside the citizen.—George Washington

---	---

June 10 - 43

Arrived here - Schmitzer Beach on the Wash (20 miles from Kings Lynn) last evening. For the next ten days we will live in tents - even the mess hall is in tents.

Heard Ack Ack about noon thought sure there was a raid but found out they were only practicing

June 20 - 43

Left school by truck convoy and arrived Thorpe Abbet - looks all right - has to be, its our home until we get our 30 missions in.

June 26, 1943:

Went on diversion raid over Le Mones - was supposed to return to bomb but was called back by Hqts.

10 - 500 pound bombs

Even God lends a hand to honest boldness.—Menander

Let it be your pride to show all men everywhere not only what good soldiers you are, but also what good men you are.—Woodrow Wilson

June 28-43
 A red letter day - !!

2 - 2000 pounds

We have one raid under our bellies. Blasted hell out of St. Nazaire, a Nazi U. Boat pen. The "flak city", that's its nick name given to it because of the high amount of ack ack protection provided.

Was unmolested by enemy fighters. Our ship however didn't fare as well as we, it received several flak holes.

Had to land at Chevaneur in Deven.

Unidentified B-17-F landed in channel. Rescue was effected 34 min. later.

A mysterious bond of brotherhood makes all men one. —Carlyle

June 29-43

Left Chevaneur after working most of the night and morning repairing damage done by flak.

Fear not.—Gen. XLII: 23

--	---

July 4

July 8

July 10
Back in camp after two days in London. Seen all the sights, been drunk and had some Commando wench.
Met a nice WREN her name is V. Brassington. Very nice friendly girl. That's all - Am going to keep in contact with her maybe I'll get a pass again sometime.

Valor is the soldier's adornment.—Livy

July 11-43
While I was on pass the other crews went on a raid - Le Bourget - very little flak - heavy fighter protection -
Lost one B-17-F from our crew group. 5 enemy fighters are claimed to ~~be shot~~ have been shot down.
We are the virgin Squad of our group - as yet haven't lost man or plane by enemy action.

Worth, courage, honor, these indeed
Your sustenance and birthright are.—E. C. Stedman

Back in camp after two days in London. Seen all the sights, been drunk and had some Commando wench.

Met a nice WREN her name is V. Brassington. Very nice friendly girl. That's all - Am going to keep in contact with her maybe I'll get a pass again sometime.

July 11 - 43

While I was on pass the other crews went on a raid - Le Bourget - very little flak - heavy fighter protection -

Lost one B-17-F from our crew group. 5 enemy fighters are claimed to ~~be shot~~ have been shot down.

We are the virgin Squad of our group - as yet haven't lost man or plane by enemy action.

July 14 - 43

Went on raid to Le Bourget reached the coast of France then had to turn back because of engine.

Was out the evening before, fairly well plastered, returned to base to find we have been alerted. Started cleaning guns and took off at 5:00 A.M. without getting any sleep. Boy that's a rugged deal.

Clanton my asst. wasn't here - he will probably be court martialled for desertion.

Lt. Biddick's crew came back all shot up and the ship will be a problem for some time. Two or three of his crew will never fly again.

16-300 pounders

Where liberty dwells there is my country.
—Benjamin Franklin

July 15 - 43

Had the plane loaded and ready to go in jig time. When take off time came the raid was called off.

Place cannot be mentioned here until after we raid it, which undoubtedly will be in a day or two.

June 16 - 43

B-17-F crashed - burned - 3 people were saved - 4 others found half burned up - 3 others never found.

A horrid scene of mangled half-burned, black charred bodies. Helped drag some bodies out then got sick and left - will probably have night-mares for a week.

24 - 100 pounders

It is better to lose a battery than a battle.
—General Zachary Taylor

July 14 - 43

A horrid scene of mangled half-burned, black charred bodies. Helped drag some bodies out then got sick and left - will probably have nightmares for a week.

June 17-43
 Perhaps I spoke too soon when I remarked that our squadron was the virgin of our group. One plane is so badly damaged that it is beyond repair.
 Our target today was Hamburg! Never did reach it though. Got as far as the coast of Holland almost up to Kiel - encountered heavy fighter opposition and light flak areas. Flew at 23,000 ft. with solid overcast below us. Could not see to bomb - too suicidal to go beneath the overcast so returned home. Received a few bullet holes in our plane. Day otherwise uneventful.

10-500 pounders

He went forth conquering and to conquer.—Rev. VI: 2

June 18-43
 Were awakened at 2:30 P.M. Another mission! This time - Kassel - Ger. Again take off time drew close and again mission was scrubbed. Am rather glad. This mission was too far in German territory and far too heavy fighter opposition to suit my vanity. It really would have been tough. Our position was in the lead group lower element the worst place of all. We would have been the cushion to absorb all the flak and fighter opposition for the rest of the groups.

10-500 pounders

Fight the good fight of faith.
 —I Tim. VI: 12

June 17 - 43

The worst place of all. We would have been the cushion to absorb all the flak and fighter opposition for the rest of the groups.

10 - 500 pound bombs

July 24-43

Target for today - Trondheim - Norway
This was the longest raid in Fortress history, 1800 miles
A beautiful trip over high snow covered mountains, green valleys and greener fjords.

Encountered approx. 15 enemy fighters and light flak over target.

Hit target beautifully. Must have hit oil storage tanks for smoke rose fully 5000 feet.

Froze my finger tips of both hands - they will undoubtedly be all right in a day or two.

The greater the difficulty, the greater the glory.—Cicero

July 25-43

Hamburg - target for today. Ger.

A dangerous trip - target is well covered by heavy flak concentration.

S-2 informed us of a huge amount of fighter opposition but lucky us we met none - evidently they were successfully drawn away by our diversion force.

Overcast covered target so we hit Kiel instead. The best protected target outside of Berlin in whole Germany. Saw two B-17-F's go down without a man saved - this unnerved me to such an extent that I actually started shivering. Made good hits

Do your duty in all things. You cannot do more. You should never wish to do less.—Robert E. Lee

and returned with minor injuries to plane.

July 24 - 43

Target for today - Trondheim, Norway.
This was the longest raid in Fortress history, 1800 mile. A beautiful trip over high snow covered mountains, green valleys and greener fjords.

Encountered approx. 15 enemy fighters and light flak over target.

Hit target beautifully. Must have hit oil storage tanks for smoke rose fully 5000 feet.

Froze my finger tips of both hands - they will undoubtedly be all right in a day or two.

July 25 - 43

Hamburg - target for today. Ger.

A dangerous trip - target is well covered by heavy flak concentration.

S-2 informed us of a huge amount of fighter opposition but lucky us we met none - evidently they were successfully drawn away by our diversion force.

Overcast covered target so we hit Kiel instead. The best protected target outside of Berlin in whole Germany. Saw two B-17-F's go down without a man saved - this unnerved me to such an extent that I actually started shivering. Made good hits and returned with minor injuries to plane.

July 26-43

Again the target is
Hamburg - Ger.

Take off at dawn -
a beautiful dawn - a
blood red sun and golden
clouds in a grey blue sky.

Half way over the channel
we developed engine trouble
and had to come back.

Its bad to leave a spot
open it leaves the formation
more vulnerable. But it
was either lag behind and
get shot down or go home
and come again when
the plane is in tip top
shape.

We have room for but one loyalty, loyalty
to the United States.

—Theodore Roosevelt

July 28-43

Target - Oschersleben Ger

Today we are alternate
ship - that is - fill in
~~until~~ when another
plane falls out of
formation because of
trouble. None fell out
so at the predetermined
time we turned around
and came home.

The cause of freedom is the cause of God.—W. L. Bowles

July 26 - 43

Again the target is Hamburg – Ger.

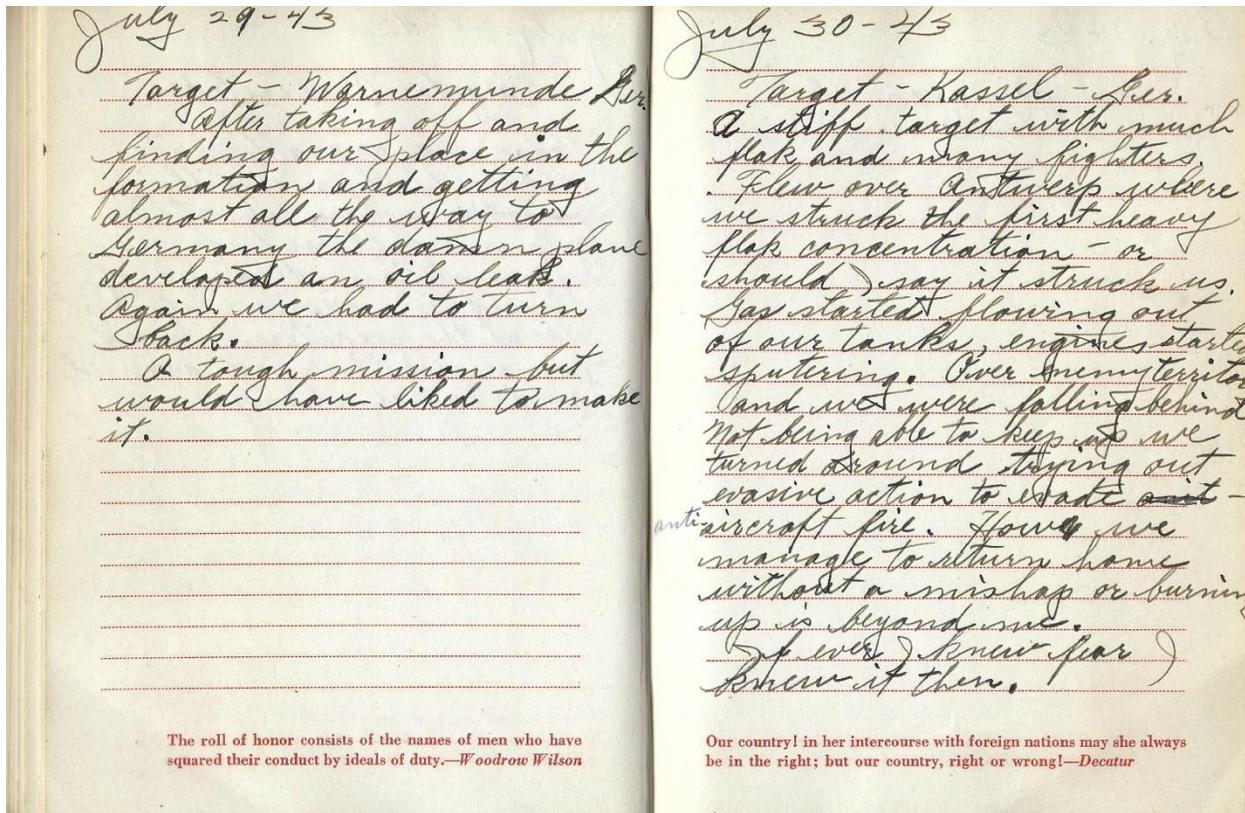

Take off at dawn – a blood red sun and
golden clouds in a grey blue sky. Half way
over the channel we developed engine
trouble and had to come back.

Its bad to leave a spot open it leaves the
formation more vulnerable. But it was either
lag behind and get shot down or go home
and come again when the plane is in tip top
shape.

July 28 - 43

Target – Oschersleben Ger.

Today we are alternate ship – that is – fill in
~~until~~ when another plane falls out of
formation because of trouble. None fell out
so at the predetermined time we turned
around and came back home.

July 29 - 43

Target – Wornmunde Ger

After taking off and finding our place in the formation and getting almost all the way to Germany the damn plane developed an oil leak. Again we had to run back.

A tough mission but would have liked to make it.

July 30 - 43

Target – Kassel – Ger.

A stiff target with much flak and many fighters. Flew over Antwerp where we struck the first heavy flak concentration – or should I say it struck us. Gas started flowing out our tanks, engines started sputtering. Over enemy territory and we were falling behind. Not being able to keep up we turned around trying out evasive action to evade anti-aircraft fire. How we managed to return home without a mishap or burning up is beyond me.

If ever I knew fear, I knew it then.

Aug. 1-43

Am going on 48 hr.
pass to London.

The world was never more unsafe for democracy than
it is today.—Stanley Baldwin

Aug. 2-43

An order came thru
recalling us to our base.
Something is cooking,
must be a big mission
to call the whole group
back.

Dare, will, keep silence.

—William Bolitho

Aug. 1 - 43

Am going on 48 hr. pass to London.

August 2, 1943:

An order came thru recalling us to our base.
Something is cooking, must be a big mission
to call the whole group back.

Aug. 3-43

Mission scrubbed.

And you can win, though you face the worst,
If you feel that you're going to do it.—Edgar A. Guest

Aug. 12-43

Target - WEESLING
Bomb - 10 - 500-lb. Fragmentation
Altitude - 26,000 ft.
TAKE OFF - 6:00 AM.
LANDED - 10:45 AM.
FLAK - heavy - much of it but inaccurate

Upon arriving at target it was covered over by a cloud layer - went on to secondary target which was Bonn. Did a bang up job there.

What can alone ennoble fight? A noble cause!
—Thomas Campbell

Aug. 3 - 43

Mission scrubbed.

Aug. 12 - 43

Target - Weesling
Bomb - 10 - 500-pound fragmentation
Altitude - 26,000 ft
Take Off - 6:00 A.M.
Landed - 10:45 A.M.
Flak - heavy - much of it but inaccurate

Upon arriving at target it was covered over by a cloud layer - went to secondary target which was Bonn. Did a bang up job there.

Sept. 3-43

Target - Paris - Renault works
Bomb - 12 - 500 Fragmentation
Alt. - 23,000
Take off - 5:50 AM.
Land - 11:00 AM.
FLAK - Heavy - accurate

Muffed the bombing - such a chance to take to bomb a target and then to have it muffed.

And though hard be the task,
Keep a stiff upper lip.—Phoebe Cary

Sept. 6-43

Target - Stuttgart
13 Bombs - 12 - 250 lb. incendiary
Alt. - 20,000 ft.
Take off - 5:15
Land - 14:15
FLAK - medium to heavy

Arrived at target as scheduled. Group before us went over target but didn't drop their bombs because clouds covered it. This group got hit quite bad by flak. We went around flak area and started looking for another target. Here we were tramping all over Germany looking for a target. Spotted an airfield from which enemy planes were taking off - caught them with their pants down. Damaged the runways so they couldn't take off then bombed the field proper.

A republic may be called the climate of civilization.

Victor Hugo

Sept. 3 - 43

Target - Paris - Renault works
Bomb - 12 - 500 Fragmentation
Altitude - 23,000
Take off - 5:50 A.M.
Landed - 11:00 A.M.
Flak - Heavy - accurate

Muffed the bombing - such a chance to take to bomb a target and then to have it muffed.

Sept. 6 - 43

Target - Stuttgart
Bombs - 12 - 250-pound incendiary
Altitude - 20,000 ft
Take off - 5:15
Landed - 14:15
Flak - medium to heavy

Arrived at target as scheduled. Group before us went over target but didn't drop their bombs because clouds covered it. This group got hit quite bad by flak. We went around flak area and started looking for another target. Here we were tramping all over Germany looking for a target. Spotted an airfield from which enemy planes were taking off - caught them with their pants down. Damaged the runways so they couldn't take off then bombed the field proper.

its a wonder we didnt get our ass shot off, but the diversions were well pulled and we encountered only a few fighters approx. 35. This raid was the biggest farce and screwed up affair I've seen pulled yet. We shouldn't have been up at all that day for the weather was lousy and then go ambling ~~over~~ all over enemy territory as if we were on a Sunday stroll - God I can't get over it. Capt. Woodward had trouble and went to Switzerland.

Sloth, like rust, consumes faster than labor wears.
—Benjamin Franklin

Sept. 7-43

Target - WATTEN
Bomb - 2-2000 lbs
Alt - 23000
take off - 6:00
land - 9:00
FLAK - medium

MILK RUN

Had fighter escort all the way was in a good position in formation - Didn't catch any flak - no fighters - slept most of way there. First easy mission since we became operational.

What bosom beats not in his country's cause?
—Alexander Pope

It's a wonder we didn't get our ass shot off, but the diversions were well pulled and we encountered only a few fighters approx. 35. This raid was the biggest farce and screwed up affair I've seen pulled yet. We shouldn't have been up at all that day for the weather was lousy and then ambling all over enemy territory as if we were on a Sunday stroll - God I can't get over it. Capt. Woodward had trouble and went to Switzerland.

Sept. 7 - 43

Target - Watten
Bombs - 2 - 2000 lbs
Altitude - 23,000
Take off - 6:00
Landed - 9:00
Flak - medium

MILK RUN

Had fighter escort all the way in a good position in formation - Didn't catch any flak - no fighters - slept most of the way there. First easy mission since we became operational.

Sept. 15-43

Target - Paris - ME 110 reconditioning plant.

Bombs - 12 - 500 Demolition

Takeoff - 15:45

Land - 21:35

Alt. - 23,000 ft.

Flak - Heavy and it scared hell out of me. (us)

Took off in daylight left target at dusk - most dangerous time of day - reached English coast in dark. When all those planes tried to land it was like a hundred bees trying to get at a pinpoint of jam. It's a wonder some planes didn't smash into one another in the mad melee.

The sound body is a product of the sound mind.

-G. B. Shaw

View the most beautiful sunset and moonrise from 20,000 ft. since leaving Boise, Idaho.

Let brotherly love continue.

View the most beautiful sunset and moonrise from 20,000 ft. since leaving Boise, Idaho.

Sept. 17 - 43

Target - Bourdeau
Bombs - 10 - 500 lb. demolition
Take off - 11:30
Land - 22:35
Altitude - 20,000 ft.
Flak - moderate to heavy

Arrived target as scheduled. It was concealed by cloud bank - secondary target too was covered. We wandered all over France looking for a target - a repetition of the Stuttgart raid - Finally we bombed submarine slipways at La Peluce. Flak hit us in #4 engine had to limp home on three engines. When fighters

hit group behind us we thought we were done for - for with only three engines we were lagging dangerously behind and at only 200 ft. altitude. Fighters hit us off the coast of Brest 60 miles out at sea. It was dark long before we came to England but when we saw the coast line thru the dark we all let out a sigh of relief for here was protection.

Before the fighters hit us we dumped armor plating and ammunition overboard to lighten plane so it would keep up with the rest of the planes but still we lost them.

Next day we all went to church.

Sept. 18-43 scheduled to raid Schweinfurt a tough place - glad it was scrubbed. Want to put off going there as long as possible.
 Sept. 21-43

Was rudely awakened at 1:00 A.M. this morning. Damn them I haven't gotten over the last raid yet and here they come at such an unearthly hour.

Target - Paris another plane plant
 Bombs - 12 - 500 lb. demolition
 Alt. - 24,000 ft.
 Take off - 6:00
 Land - 9:45
 Flak - heavier than last time for we would be within range of more guns and the enemy also has added a few more to the already startling number - (75)

 Took off - was almost assembled - then order came thru - "operations cancelled".
-Perianteri

To bad - after all the trouble of getting up so early and getting guns all set and plane ready and then to get off the ground only to have the mission scrubbed is provoking. The trouble is we will still have to make the raid at a later date.

He who is not prepared today, will be less so tomorrow.
 -Ovid

<p>Sept. 23 - 43</p> <p>Target - Vannes, France Bombs - 12 - 500 lb. demolition Take off - 5:15 Land - 11:00 Altitude - 23,000 Flak - light - inaccurate</p> <p>A most beautiful sunrise was the only eventful thing except that one lame enemy fighter thought he could buck the formation plus two squadron of escorting P-47's.</p>	<p>Sept. 24 - 43</p> <p>Target - Stuttgart Bombs - 40 - incendiaries 100 lbs. Take off - scheduled at 8:55 Land - scheduled for 15:30 Altitude - 24,000 Flak - medium to heavy</p> <p>Today our crew was a spare, to fill in in case of any one aborting - aborting is to return because of mechanical or other failure. Our ball turret was out so we never took off but was still the mission was scrubbed - Damn it we still have to go there. Its one place I want to skip!</p>
--	---

Sept. 26-43

TARGET - PARIS - Renault works
Bomb - 12 - 500 lbs.
Alt. - 23,000
TAKEOFF - 15:00 HRS.
LAND - 20:00 HRS.
FLAK - HEAVY
ESCORT - P-47 + Spit 9

Today we were in Purple Heart corner - which means the part of the formation which is most likely to be wiped out. Of course we have held that position before but that was earlier in our combat ~~career~~ ^{career} and we then didn't know the story - also now we are getting more and more nervous. Well we went over France

Democracy's ceremonial, its feast, its great function, is the election.—H. G. Wells

only to find the primary as well as the secondary target covered by overcast. After going over France risking my ass and then not doing any good sure makes me mad. Will have to return until we can wipe out the target. It's a reconditioning plant for ME 109 & 110. It covers an area of 40 acres - been hit before in one section but we must wipe out entire plant. Anyway we brought back our bombs and the armorers didn't even bother unloading them for we were alerted for the next morning with same bomb load.

I have not yet begun to fight.

—John Paul Jones

Sept. 26 - 43

Target - Paris Renault works
Bomb - 12 - 500 lbs.
Altitude - 23,000
Take off - 15:00 hrs.
Land - 20:00 hrs
Flak - Heavy
Escort - P-47 & Spit 9

Sept. 27-43

Target - Emden, Germany
Bomb - 12 - 500 lbs.
Alt - 24,000
Take off - 6:00 hrs.
Land - 12:00 hrs.
Flak - 40 heavy guns 60 light (considered bad)
Escort - THREE Groups of P-47

This is an experimental flight to try out new radio equipment for bombing thru clouds.

Got over Emden dropped our bombs - when they stink missed the target altogether and laid the town low.

Usually we only go over a target with the strength of 63 bombers but this time we had 280 and from now on more and more will go.

This too is a target we will have to go back to!

Heroism feels and never reasons and therefore is always right. - Emerson

Sept. 28-43

We were promised a well earned rest today but just now we received word that there may be an afternoon mission.

Damn here we sweat again.

Well we are credited with seventeen missions and four enemy fighters. One waste gunner got one the ball turret gunner got three. So far that's not a bad score but we still hope to tally up some more.

Patriotism is a lively sense of collective responsibility.

-Richard Aldington

Sept. 27 - 43

Target - Emden, Germany
Bomb - 12 - 500 lbs.
Altitude - 24,000
Take off - 6:00 hrs.
Land - 12:00 hrs.
Flak - 40 heavy guns 60 light (considered bad)
Escort - Three groups of P-47

<p>Oct. 4 - 43</p> <p style="text-align: right;">No. 18 7 more to go!</p> <p>Target - Hanan Bomb - 6 - 1000 lbs Take off - 7:30 A.M. Land - 14:00 hrs. Altitude - 25,000 Flak - NONE Fighter support - in but not out</p> <p>What a humdinger! We were first wing over target no fighters bothered us. Lucky we were again for we made two bomb runs on Hanan didn't drop anything either time - made one run on Frankfurt a Main which was the secondary target there we encountered</p>	<p>quite a lot of Flak - didn't drop our bombs then either. Made another run on the primary target and dropped our eggs. Not very good results I don't believe. Bet the Germans were considering what in hell we were doing to do - they must have gone nuts waiting for us to bomb. Our three groups comprising our wing got separated with at least 20 miles between - if the Germans had known that they could have sent up about 100 fighters and annihilated us, one group after another. Boy, Lady luck sure sticks close to us - or can it be some other force protecting us?</p>

October 10, 1943

Target - Munster
Shot down on mission

Adolph Blum flew 26 missions into enemy territory with 18 as bombing missions. The plane was hit by Flak, killing one crew member, Harold Clanton. German fighters knocked out two of the four engines. Nine of the crew bailed out successfully, were captured, and kept in a German POW camp. Blum weighed 85 pounds when released.

ROYAL FLUSH

Published on October 10, 2016

By Thomas Van Hare

On Sunday, October 10, 1943 — 73 years ago in aviation history — the 8th Air Force flew a bombing raid against the city of Münster in Nazi Germany. At the time, America's airmen were still fairly inexperienced, having only just begun six months earlier flying bombing raids against Nazi Germany. Despite extensive planning, the mission that day became one of the worst disasters in 8th Air Force history. Among those who flew that day, the airmen of the 100th Bomb Group (Heavy) suffered the worst — of the 14 bombers that pressed on to the target, only one bomber made it back. After Münster, the 100th Bomb Group's nickname would be forever fixed in memory as "The Bloody Hundredth".
